# Zooms that make taking pictures more fun.

There are so many scenes in life that you want to capture in photos whether travel, parties, weekend jaunts or walks in the park... not to mention all those good times and precious moments with family and friends. The two Tamron Family zoom lenses are ideal for all of these occasions. Our state-of-the-art zoom lenses are lightweight and compact and so easy to use yet produce great results which makes your picture taking more enjoyable.

## The way you want it— you choose from the wide selection of focal lengths.

There are various scenes you may want to photograph like magnificent landscapes; snapshots in the park; wonderful moments at parties; or close-ups of your children. Use the wide-angle end (28mm) to shoot panoramic landscapes. The telephoto end (210mm) can be used to shoot dramatic close-ups like the winning smile on a child's face. All you have to do is zoom in on the scene you choose. Operating the lenses is easy, even if you have no experience with single-lens reflex system.

## It's light— both lenses together weigh just 520g.(18.3oz.)

Whether you are traveling a great distance or simply walking in the park you will realize, the lighter the better. The Tamron Family zooms weigh only 520g combined. These lightweight, compact lenses are made possible by using engineering plastic backed by Tamron's precision design and molding technology.

## Eternal— beautiful moments captured in beautiful pictures.

The 28-80mm features an Aspherical element which greatly improves photographic performance by compensating for the distortion typically found in the wide-angle range. The Tamron Family zooms use the latest in optical technology so you can be sure your precious moments will be faithfully reproduced in high quality pictures.

Capture the priceless expressions of your children.
